1. Fees and Charges:

All Fees & Charges are subject to modification based on periodic review by the Bank. Bank will give 30 days' advance notice before any changes are made to fees & charges levied. The Bank also reserves the right to introduce any new fees or charges, as it may deem appropriate, with due intimation to you.

1.1. Joining Fees and Annual fees:

Card Variant	Joining fees	Annual fees
Corporate Platinum Credit Card (Individual Liability)	NIL	NIL

1.2. Interest Free Period:

The standard period to make the payment for commercial cards after the statement is generated in 18 days.

Interest free period from the start of the billing cycle date shall not exceed 48 days. Therefore free credit period can range from 18 to 48 days depending on your Payment Due Date. However the, interest-free credit period' will be suspended if any balance of the previous month's bill is outstanding.

Illustrative Example for Interest Free Credit Period Calculation (30+18 days):

For a statement from the period 1st April to 30th April, the payment due date will be 18th May. Assuming you have paid your previous month's dues in full, the interest free credit period would be:

- For the purchase dated 1st April, interest free credit period will be from 1st April to 18th May i.e. 48 days and
- For the purchase dated 12th April, interest free credit period is will be from 12th April to 18th May i.e. 36 days.

However, if you have not paid the previous month's balance in full before due date, then there will be no interest free credit period.

1.3. Finance charges:

Card Variant	Interest Charges		Cash Withdrawal / Advance per 10,000 or part thereof	
	Monthly Rate	Annual Rate (APR)	Withdrawal Fee	Annual Rate (APR)
Corporate Platinum Credit Card (Individual Liability)	3.50%	42%	₹300	42%

1.4. Interest Charges

Interest will be charged on a daily accrual basis if you do not pay the previous bill amount in full on or before the due date; Interest will be charged from the date of transaction until the date of payment. Interest would also be charged if the full payment is received after due date but before the next statement date. If you have been making a partial payment but you have paid the current statement outstanding in full on or before Payment Due Date then interest will be charged on the total outstanding of the current statement till the date of full payment. The interest so charged will reflect in subsequent statement.

Illustration of Interest Calculation: Assume that you have an outstanding balance of ₹10,000 for the purchase made on 15th March. The statement generated on the 31st March will show balance of ₹10,000. You make a payment of ₹ 4,000 on the 10th April. And you make a purchase of ₹ 2,000 on the 15th of April. You make no further payment on your credit card till 30th April. In this case interest will be levied as follows:

Daily rate of interest in case Interest at 3.5% per month= (3.50%)*12/365= 0.115%.

On the balance of ₹10,000 (15th Mar-31st Mar) for 17 days= $10000*0.115\%*17 = ₹ 195.62$
On the balance of ₹10,000 (1st April- 9th April) for 9 days= $10000*0.115\%*9 = ₹ 103.56$
On the balance of ₹ 6,000 (10th April- 14th April) for 5 days= $6000*0.115\%*5 = ₹ 34.52$
On the balance of ₹ 8,000 (15th April-30th April) for 16 days= $8000*0.115\%*16 = ₹ 147.29$
Total Interest Charged = ₹ 480.99; Total Outstanding = ₹ 8480.99

In the above example, statement generated on 30th April with Total Amount Due of ₹8480.99. You make a payment of ₹ 8480.99 on 15th May and you make no purchase in the month of May. Then in the next statement generated on 31st May you will be charged with interest of ₹ 136.63. (On the balance of ₹ 8480.99 (1st May - 14th May) for 14 days (8480.99* 0.115% *14 =136.63). Additionally making only the minimum payment every month would result in the repayment stretching over months/ years with consequential compounded interest payment on your outstanding balance.

Interest & Late Payment Charges will be applicable as mentioned in schedule of charges if no payment or payment is less than MAD amount. Making only the minimum payment every month would result in the repayment stretching over months/ years with consequential compounded interest payment on your outstanding balance.
